**PICASSO IN PALM BEACH FOR THE FIRST TIME**  
*Art Palm Beach to debut "Tete"*

**West Palm Beach, Fla. (Jan 25, 2023)** – Art Palm Beach is pleased to announce a new addition to the show that begins this week. A rare Pablo Picasso painting named 'Tête' will be showcased for the first time in our area. This is a late and magnificent self-portrait by Picasso. It is one of four important works he executed in 1972 linking his features with those of other prominent subjects. This is the first time this Picasso has ever been shown and will be available for purchase at a Palm Beach art show. Media is welcome to come see "Tete" in person at the Art Palm Beach VIP event starting Wednesday night or any of the show days ending Sunday.

Art Palm Beach is directed by the producers of the prestigious LA art show and this year is focused on climate change with the inclusion of immersive experiences focused on the climate crisis and the impact humans are having on our planet. There is also a collaboration between artist Guillermo Anselmo Vezzosi and scientist Dr. Eric Larour from NASA's Jet Propulsion Lab. The immersive experience and art exhibit in rising sea levels will also include a sculpture by Vezzosi, bringing new life to discarded waste

**WHO:** Art Palm Beach
